Dealers Expect Rosy Start For 2004
Early Coinage Remains in Strong Demand

The new year promises to begin with the same bullishness that we have come to know in 2003. Many dealers have enjoyed a year that has been filled with sustained demand for the entire 12 months. This demand has been maintained due to a number of reasons, but mainly because interest in the rare coin hobby has been growing. Individuals have become weary of the financial markets and so they are playing a more cautious role this time around by diversifying some of their funds into the rare coin market. They also have witnessed the precious metals escaping their long depressed market in 2003 and breaking through levels that haven't been seen for many years. Increased demand for bullion only leads to an increase in demand for numismatic coins. It has also been a year that has seen the sight-unseen market experience phenomenal demand and Bid increases. Confidence in buying sight-unseen along with the strong need for coins, has combined to force prices higher. In some cases for select series, prices have increased dramatically this year. Many of the most popular areas of numismatics have enjoyed this sensational demand. The Morgan Dollar series immediately comes to mind. This series offers modest collectors and serious collector/investors significant challenges. We have seen dealers post strong sight-unseen Bids for select key and semi-key dates in the Morgan series throughout 2003. However, its the sharp increases taking place among generic Morgans that are most encouraging. Today, early in 2004, we are still witnessing strong sight-unseen Bids for select Morgan Dollars. Many of these dates remain on want lists just waiting to be filled. Dealers carry these want lists with them to coin shows and auctions hoping to buy the right pieces for their customers. This market trend is expected to continue in 2004 and it will have its initial test during the first major show and auction of the new year. The Florida United Numismatist Convention and Show will be held in Orlando January 8-11. Most, if not all of the major rare coin dealers plan to be in attendance during this important show. Activity is expected to be heavy on the bourse. Heritage will host their 2004 FUN Signature Sale on January 7-10. Dealers will be busy viewing auction lots prior to the sale and carefully planning their strategy for the coins that they intend to place Bids on. Besides Morgan Dollars, we believe that Gold coins of all dates and denomination will be facing strong demand in Orlando. Spot Gold has given collector/investor's confidence to buy common date Saints and Liberties in several Mint State grades. We have seen Bids increase in recent weeks as Gold strengthens and should 2004 mirror some of Gold's activity that we saw in 2003, then you can expect this trend to continue as well. Along with common date Gold, rare date Gold has begun to jump. We know from dealers that specialize in this area that there isn't enough rare date Gold on the market to meet the current demand. As this better date Gold becomes available, it is being snapped-up for well-heeled collector/investors just waiting to put several pieces away. Charlotte, Dahlonega, Carson City and New Orleans issues are all experiencing strong demand. Early Gold Type has increased dramatically in 2003 and we still see Bidders continuing to post strong and increasing sight-unseen Bids for these coins in early 2004. We would be remiss if we didn't recognize the strong sight-unseen Bid increases for early Copper and Silver Type coins. The early coinage portion of the market is amazingly strong. Demand especially favors one and two-year Type issues. Again, it's a simple supply/demand imbalance with more buyers than sellers. Consequently, we also expect this portion of the market to continue to be hot early in 2004. Finally, key dates of all series are facing some of the strongest demand. Demand for keys indicates consumers of coins working on sets and a promise for future optimism.

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."

And naturally, IT'S IN AN ICG HOLDER!

44-COIN HOT LIST ◆ 44-COIN BLACKLIST

Foreword by Q. David Bowers

"*Scott Travers' Top 88 Coins Over $100* is potentially enriching, educational and enlightening. It provides market-oriented information against a rich backdrop of the history and lore of coins. *Top 88* is far more than just an investment book - it's a landmark work that opens the world of coinage to the reader!

◆ **R.W. Julian**, numismatic researcher and scholar

"Read this book closely and you'll get a new perspective on what really counts when you buy and sell coins. Follow the recommendations embodied in these pages and you'll be well on the way to being a winner yourself!"

◆ from the introduction by **Ed Reiter**, former numismatics columnist, *The New York Times*

Buying and selling rare coins can be a hit-or-miss proposition - unless you get expert directions. This book by well-known New York City coin dealer Scott A. Travers, with a foreword by Q. David Bowers, is a perfect guide.

In *The Top 88*, Travers draws a road map detailing both the hits and the misses - the coins that in his opinion represent good value at current market levels and those in his opinion you should steer clear of. He identifies 44 winners and 44 losers, puts them in historical perspective and vividly describes why each could be your best or worst coin buy. The list runs the gamut from classic U.S. coinage of the nation's early years to such modern-day issues as the Susan B. Anthony dollar.

You'll learn that winners and losers can exist side by side within the very same series. And you'll see how a given coin can sometimes be a winner in one grade, or level of preservation, and yet be a loser in a grade just a little bit higher or lower.

This book, like a piano, provides you with 88 keys that will help you make beautiful music - only this time, according to Travers, you'll be singing all the way to the bank if you play the right "notes" in buying coins.

You'll learn about:

- The elements of value
- **Independent third-party grading**
- The age of type coins
- **Opinions relating to what coins are "losers"**
- A list of coins that are "winners"
- **Why every coin listed has something to like and something to dislike**
- One-year type coins
- **Generic Morgan dollars**
- Commemorative coins
- **Mint-error coins**
- Uncirculated late-date coins
- **Late-date proof sets from 1968 to date**
- Marketplace data and expert opinions on every listed coin
- **Meticulously researched historical information**

Business Is Booming At FUN Show
Two Florida Auctions Realize Over $10 Million

All the dealers that we spoke with prior to the new year said that things are great and will only get better in 2004. The initial reports that we received from dealer set-up day at the FUN show in Orlando confirm that these dealers were from right on the money. Dealers tell us that the set-up day bourse was extremely active with much business taking place. Most of the dealers were interested in buying rare coins with demand continuing to outstrip the supply. "Anything interesting or nice" was extremely salable. However, one dealer did tell us that just about "anything" was selling because the market is so good. Dealers are simply "pumped" about the current bull market. The two rare coin auctions that preceded the FUN show also did very well. The January 5-6 Classics Sale of the Thomas H. Sebring Collection of Shipwreck Coins among other consignments by American Numismatic Rarities, claimed more than $4.4 million. Also, the January 6 Pre-FUN Orlando 2004 Elite Coin Auction conducted by Superior Galleries realized just over $6 million. We have listed a few certified highlights from each sale.

Strong increases in the precious metals have certainly provided an added kick to a market that was already performing admirably. As this article is being written, Gold has shot up past $420 per ounce while Silver is selling at $6.25 per ounce. Both increases have pushed the per ounce price to levels that haven't been seen in many years. Strength in Gold and Silver is also stimulating more interest in bullion related coins from the general public as well as collectors. However, it's the small percentage of the general public whose interest in some numismatic material that will provide added steam for this market. This is just another example of why the collector base is increasing. Gold coins are in strong demand today. We have been witnessing steady increases for Mint State Type Gold, and this week, supporting sight-unseen Bids are found for nearly all generic Types and denominations. Keep in mind that many dealers are away in Florida and haven't had the time to post new Bids. Still, take a look what is happening in the **early** Gold market. We have a large number of Bid increases chasing these rarities. Early Gold is hot and dealers are looking to buy all they can in any denomination and grade. Plus signs are found in all grades and dealers will take NGC, PCGS, ICG and ANACS graded examples **sight-unseen**. Some of the sight-unseen Bid jumps are quite healthy. Just check out the strong Bids for $5 Capped Head, Small Diameter examples this week. Notice the huge jump for those grading Mint State 65! Buyers are waiting for coins and dealers are trying to satisfy this demand. It also looks as if Morgan Dollars are beginning the new year exactly the same way it did in 2003. Buyers are trying to find the better dates and they are willing to increase Bid in an effort to be successful. Like last year, dealers want the popular "CC" Mint Morgans. However, select New Orleans and San Francisco Minted **key** dates are also increasing. We even notice some substantial jumps in the key, 1928 Peace Dollar. Generic Morgan Proolikes are higher reflecting strong demand for generic Dollars over the past month. Early key date Walkers are receiving some play while Silver and Gold Commems are steady as is the rest of the sight-unseen market. It certainly appears that 2004 is off to an excellent start!

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers (are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the ***Sight-Unseen*** *certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XIX No. 3 January 16, 2004 Single copy price $4.00

January Is A Hot Month For Rare Coins
Heavy Auction Schedule Continues

The new year has begun with strong activity and **higher sight-unseen Bids** for certified rare coins. The Florida United Numismatists show and auctions made quite a statement in early January. Dealers in attendance were very pleased with the market and the prospects for the rest of 2004. Dealer explanations for the continued bull rare coin market were numerous with most pointing towards the expanding collector base. There is a definite consumption of rare coins taking place unlike past years where coins were flopped for small, quick profits. The bourse at FUN was hopping with most dealers staying pretty busy for the duration. On the buying end, little has changed since last year, it is still extremely tough and competitive to acquire fresh material. Those dealers that have a nice diverse and interesting inventory seem to be in the driver's seat. Strong and aggressive Bidding is taking place for these coins and dealers are surely benefiting. The perception that the economy is improving has given buyers more confidence and a willingness to add some additional rare coins to their portfolios. Also, relatively low interest rates continue to be an advantage for a market that is predominately selling non-interest bearing assets. Increased Spot prices for Gold, Silver and Platinum have also helped to push values higher. However, volatility is quite evident as Gold and Silver have succumb to some profit taking. Still, the general consensus points toward higher levels for the metals.

Strong Bidding is forcing NGC and PCGS MS66 generic Morgans substantially higher to a new sight-unseen Bid of $240. Increased Bids on generic coins usually indicate that buyers are currently available and more of the general public is participating. Gold Commems are also attracting higher sight-unseen Bids in mid-January. Select Proof and Mint State Type increases are an example of how strong the Type markets remain in January. Early Walkers, early Gold Type, $20 Saint-Gaudens and Mint State Type Gold are some of the areas that continue to impress dealers early in the year. If mid-January is any indication for the rest of the year then dealers will have plenty of reason to smile.

January continues to unleash an explosion of auction lots. It's almost as if the market has gotten its wish and is receiving a nice quantity of quality rare coins that it so desperately needed. Three auctions are scheduled for the latter part of the month. First, Stack's of New York will host the Americana sale followed by the WM. Thomas Michael's Collection of Ten Dollar Indians. These sales will be held in New York January 20-21. Next it's cross country to Beverly Hills, California where Superior will conduct the Pre-Long Beach Elite Coin Auction. Several collections are featured including the Dry Tortugas Shipwreck collection. This sale will take place January 25-27. Finally, another Pre-Long Beach Auction, by Ira & Larry Goldberg Coins and Collectibles will be held January 25-28 in Los Angeles. This sale features the Jersey Shore Collection among other rare coin consignments. We have listed a few of the many certified highlights from each of these auctions.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Generic Dollars Move Higher Sight-Unseen Market Is Booming

The Long Beach Expo is the headline draw as we close out January. Many will be heading west for the upcoming public auctions and the all important first Long Beach Expo of the year with dealers setting-up on January 28. Dealers have to be happy with the state of the coin market so far in 2004. Nearly every dealer that we talk with has nothing but positive things to say about one aspect of the market or another. A dealer in the northwestern portion of our nation said, "There's a huge amount of interest all around." He said that he hasn't seen this kind of a strong market since 1989. All seem to agree that we are experiencing a broad-based, collector driven bull market. A large portion of the coins being sold today are actually going to end users who are taking them off the market for an extended period of time. To dealers, it seems as if everything is selling from modern coins and Commemoratives to scarce date early material. The demand for coins is being fueled by a number of economic and coincidental factors that have come together to form a powerful attraction towards coins. The circulating State Quarters, Sacagawea Dollars, and new designs on our Paper Money have played an important role in creating renewed interest in numismatics. Lets not forget that we will have 2004 Jefferson Nickels with new **reverses** circulating very soon. Concerns about the quality of life and family have increased since terrorists have put everyone on edge. Moreover, interest has been further stimulated by public distrust and disillusionment in stock market and mutual fund performances. Add continued low interest rates and strong precious metal prices to the equation and you can begin to see why the interest in coin collecting/investing has become so powerful.

The sight-unseen market has been very active and volatile in January. A healthy sight-unseen market is a further sign that the coin market is prospering. Bidders are aggressively increasing their Bids for select coins and segments of the market. It comes as no surprise that one of the hottest areas of the rare coin market in 2003 is also one of the hottest early in 2004. Interest in Morgan Dollars is forever linked to the tradition and lore of our colorful American west. Most people, even though they never collected rare coins, are drawn to these large Silver coins of the late 19th and early 20th century. Consequently, it's not unusual that telemarketing firms are looking to buy quantities of Dollars to offer to a hungry and buying public. Demand for these Dollars is so strong that dealers receiving these orders are easily willing to raise Bid in an effort to fill the order. **Generic** Dollars are the object of this telemarketing demand. They are buying quantities of NGC and/or PCGS certified Dollars grading MS64 thru MS67 for strong money. They can care less about what the coins actually look like - they just need the product. As one dealer put it "they can be real dogs, send me all your uglies." Common date DMPL Dollars have also made gains in 2004, and we still see strong Bids for select rarities as well. Just check out the jump Bid for 1902 DMPLs that grade MS64 DMPL. Common date Peace Dollars are following the lead of Morgans as they sport some gains of their own. Gold Commems are off and running in the new year too. This series made quite a splash last year and it looks as if the demand is still with us in the new year. Quality grades are receiving the bulk of the demand. Mint State and Proof Type, as a group, are among the strongest areas in today's market. This week, we see select increases in Type for Copper, Copper-Nickel and Silver issues. A wide range of denominations is also represented. Key and semi-key dates continue to be the focus of insatiable demand. Buffalo Nickels, Mercury Dimes, Standing Liberty Quarters and Walking Liberty Half Dollars are a few of the areas receiving this key date demand. Proof Singles are also seeing some action this week with Proof Franklin Half Dollars being particularly strong. This booming market is difficult to satisfy because of the continued supply and demand imbalance.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied warranty or representation that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related prices in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" – Lowest asking price during the week prior to publication (*w*eek old); "m" – Lowest asking price during the previous three weeks (*m*onth old); "t" – *T*rade during the most recent month; "lm" – Lowest asking price appearing *l*ast *m*onth; "lt" – *T*rade appearing *l*ast month; "ot" *T*rade *o*lder than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Buyers Bustling At Long Beach Expo
Two California Auctions Total $11.3 Million

The Long Beach Expo opened with trading activity moving at a hectic pace during dealer set-up. Dealers were moving almost frantically up and down the isles looking for fresh material. They were actively hoping to get a jump on the competition and fill their cases before the public was admitted. The name of the game today is having a good supply of nice rare coins. There has a been a supply/demand imbalance in the market for quite some time now, and until the situation changes the bull market will remain intact. Since the market has been increasing, nearly week after week, dealers know just how important it is to maintain a respectable inventory. They just need nice coins to complete transactions and realize a profit. Many dealers are still trying to fill their aging want lists that they have received from their customers. One **wholesale** dealer told us that his business is doing very well. Naturally he remains extremely bullish on the rare coin market. Dealers trying to fill want lists are hungry for his coins and the pieces he has are selling rapidly. He does concentrate mostly on the scarce numismatic coins of the 18th and 19th century. However, he is also having a difficult time replenishing his stock.

Demand has been exceptionally strong for Flowing Hair and Bust coinage. Bids have been increasing for this material because it is genuinely scarce and hard to come by. This week, for example, **sight-unseen** Bids have **skyrocketed** for Proof Draped Bust Dollars. Check out the huge Bid Jumps in grades Proof 61 thru Proof 67. Overall Dollars, Type and Gold are leading the sight-unseen market. One negative to report is the precipitous decrease in Spot Gold and Silver on the first public day of the Expo. A possible future change in the Federal Reserve Policy garnered from a few added words that could affect interest rates, sent the metals plummeting with the Dollar strengthening. This was probably an excuse that traders needed to take some profits. Naturally it may lower prices of common date Gold but it remains to be seen the degree of that decrease. We will see how this scenario plays out and what, if any, affect it may have on total business at the Expo.

Generally, though, it hasn't dampened the spirits of too many dealers. One dealer said, "There's a lot of liquidity in the market right now." He anticipates a broad-based rise in prices over the next 18-24 months for rare coins that have eye appeal. Virtually no area of the coin market will be left behind. He believes that several factors will contribute to this increase. A few examples include an upcoming election year and the government providing a monetary stimulus to the economy. He also believes that continued low interest rates will be an advantage for the rare coin market. Consequently, he sees a continued influx of money coming into the market from the private sector seeking to buy high quality rare coins. Also, except for some of the greatest rarities, the overall market from Type to Commemoratives is still trading at very reasonable levels with an excellent upside potential.

Two Southern California auctions realized more than $11 million in sales this week. The Pre-Long Beach Elite Coin Auction by Superior Galleries Jan. 25-27 realized $6.5 million in Beverly Hills. Also, a Pre-Long Beach Auction by Ira & Larry Goldberg C&C Jan.25-28 brought $4.8 million in Beverly Hills. We have listed a few certified highlights from each sale.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the lowest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Sight-Unseen Market Slows A Bit Carson City Dollars In Demand

It was an extremely busy time for dealers that attended the Long Beach Expo held last week. Their overall impression about the show and the rare coin market was positive. Expectations were running high at the outset as dealers participated on the busy bourse floor and auctions during the last week of January. Still, dealers knew that to be successful they would have to work hard and fast to get the coins that they needed. Even though they know it is a strong and excellent market, you can't just sit back behind your table. The work doesn't end once the coin is located either. That's when dealers need to be savvy and prudent and be able to offer strong Bids to come away with success. Most dealers also knew going in that the price levels for coins would be extremely competitive. However, many said that they were still willing to pay the strong prices necessary rather than come home from California empty handed.

The sharp decline in Spot Gold on opening day only exacerbated their task at hand. Buying and selling of Gold bullion related items on the bourse was initially crazy. It was almost like a second California Gold rush. Some dealers made exceptional profits in a matter of days but not because they planned it that way. Sometimes it takes a bit of sheer luck for you to come away benefiting from the precious metal market swings that seem to erupt out of nowhere. Yet, dealers know that the bull market fundamentals for rare coins remain intact, and the demand for such material continues as we begin February. Dealers that we spoke with still consider current market conditions to be terrific. They say that demand for select rare coins is increasing just by the number of new entries that they're adding to their already lengthy customer want lists.

As for the sight-unseen market, things may be a little less hectic than we have come to expect. The pace has slowed a bit, probably in response to Gold's battle to stay above $400 per ounce. There is some discounting taking place across the market with coins being dumped to create some cash. Areas that are beginning to show some weakness from discounting include: Classic Silver Commemoratives, Proof Singles and Mercury Dimes. We still see coins selling at public auction and in some cases, offered for sale at levels below posted sight-unseen dealer Bids. Dealers who stay on top of the market are able to prevent their businesses from suffering these needless losses. However, there are some dealers that are even able to profit by these mishaps if they act quickly and wisely. This doesn't detract too much from the overall positive market theme. We see that most series and categories of the market that we report on each week are receiving a fair number of supporting Bids. Type, Dollars and the early 20th century popular designs are freely attracting Bidders at current levels. Unfortunately, sight-unseen Bid increases, and in some cases exceptional jump Bids, are failing to realize the response that dealers are hoping to achieve. For example, this week's Morgan Dollar series is displaying strong Bidding for key date Carson City Dollars. The need is for the 1879-CC, 1879-CC Capped Die, 1889-CC and the 1893-CC. Interest is for several of these rarities, mainly in grades from MS61 thru MS64. Dealers know that collectors are always looking to buy one or more of these keys, and often, the price isn't a problem.

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

**The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."**

And naturally, IT'S IN AN ICG HOLDER!

Short-Set Walker Bids Double In Only 3 Years Sight-Unseen Market Solid As Metals Recover

It's not that dealers and collectors were overly concerned when the precious metal Spot prices fell to levels that may have raised some red flags, but nonetheless there was an air of trepidation within the coin market and the ramifications that may occur if the slide in the metals continued. However, the metal's correction appears now to be history with Gold back above $410 per ounce and Silver bouncing back as well above the $6.50 per ounce plateau. You see, those dealers and longtime collectors that have been down this road before are well aware of the importance that a bull rally in the metals means to the rare coin market. The metals got a significant boost from the Federal Reserve Chairman, Alan Greenspan. His words on February 11; "The Federal Reserve can remain patient before raising interest rates" were music to the ears of dealers enjoying the prosperity that is in place. Greenspan isn't looking to prop up the price of Gold but rather his eye is on improving this country's balance of trade deficit. Coin dealers are basically interested in seeing a continuation of the strong demand for rare coins as is being projected by most coin analysts. A continued improving economy will also help.

The sight-unseen market and its current health are a quick indication of determining if these analysts are on the right track. This market has been performing admirably so far this year, although we are only in February with much of the year ahead of us. Still, the large number of supporting Bids that are being placed throughout the market on a daily basis gives us reason to be optimistic. That's because these supporting Bids are for coins that range from the inexpensive generic examples to some of the hobby's most highly prized rarities. However, we are aware of the increased Bids that are interspersed throughout the sight-unseen market on a regular basis that give credence to the continued bullish market. This week, Walking Liberty Half Dollars are the beneficiary of a generous number of plus signs. Granted, it's the latter part of the series but since the need is for NGC and PCGS certified grades MS65 thru MS67 these Bids are significant. The popular short-set dates are being targeted with 1941-1947-D in play. As seen in our chart below, in just three years these sets have doubled in grades MS65 and MS66 and nearly so in MS67. Today, there are two dates entertaining five-figure Bids in the MS67 grade and we have seen quite a few four-figure Bids as well. Demand for short-sets of Walkers has grown, in part, because of the extreme cost and lack of availability of the tough early and middle dates of the series. Also, since most of the dates are available at levels below $1,000 in MS65, these coins remain highly affordable for collectors. Following the lead of the Walker short-set, increased Bids for Proof Singles are seen for Walkers from 1936 thru 1942 in PR64 and better. Collectors enjoy adding one or more Proof specimens to their collection. Proof examples are especially beautiful and are sure to spruce up any business strike collection. Of course, the 1936 Proof Walker is the ultimate prize with a combined PCGS/NGC population of only 59 graded in PR67 and higher. It is easy to understand why this date has four-figure sight-unseen Bids, starting in PR63. Select Proof Buffalo Nickels are also receiving some interest this week as well. Matte Proof Lincoln Cents are generating interest too with plus signs concentrating on select issues in PR64 and PR66. Proof Type is usually seen with many supporting Bids but this week dealer Bids forcing plus signs are quite evident. Capped Bust and Liberty Seated coinage are active with dealers targeting coins at the low end of the Proof spectrum. All the Liberty Seated denominations are participating with the Halves realizing the lion's share of the plus signs. Capped Bust Quarters are also on the buy lists of dealers and they are willing to take either the Large Size or Small Size Type. The increases for Bust coins are not surprising as we have reported strong interest for early coinage in 2004. Morgan Dollars are an example of how specific needs can generate jump Bids. Take a look at dates such as 1891, 1898-S and 1902-S in NGC MS65. Still, generics remain solid with increases seen for MS65, MS63 thru MS65 Prooflike and MS64 thru MS65 Deep Mirror Prooflike examples.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported High Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CERTIFIED COIN DEALER newsletter

1916 Standing Liberty Quarters Up 100%
Demand Forces Proof Gold Higher

Key dates have been arguably, the hottest portion of the rare coin market. We have seen continued demand push prices higher for many keys over the last 12 months. Dealers know that the keys are a necessary part of having an attractive inventory of rare coins. These are the coins that get the attention even if your customers can't afford them. Key dates in your inventory allow some of your other coins to be seen simply because people notice them after examining a key or two. Notice the **amazing** Bid increases this week for the key, 1916 Standing Liberty Quarter. This particular date is receiving a ton of attention from several dealers. Their clients are desperately looking to buy this issue for a number of reasons including: its rarity, beautiful design, first year of issue stature and the controversial story behind its design change. It also happens to be the tougher year of the two-year variety. This issue has been steadily moving higher, but now consider that sight-unseen Bid for NGC or PCGS slabs in grades MS63 thru MS64 increased more than 100 percent since our last report. In Gem MS65 condition, PCGS Bids increased more than 70 percent while NGC Bids doubled. Strong increases are also recorded for Full Head examples from either service in MS64 and MS65.

Gold Spot hovers near the $410 per ounce level while Silver is above $6.60 per ounce. Still, volatility is the word for the precious metals as nervous investors seem to be putting their money in one day and pulling it out the next. This situation has caused similar volatility in our Mint State Type Gold and $20 Saint-Gaudens charts. However, dealers and analysts continue to reassure their customers that Gold and Silver are in a bullish mode and may be headed higher. This week, sight-unseen Bids for $20 Saint-Gaudens are mixed. This is true for the scarce dates as well as the generic issues. Yet, we do observe that a positive bias should be given the nod to the series as more scarce dated issues are increasing. Dealers continue to service their customer needs for rare date Saints and that is where the strongest demand can be found. Interested collector/investors are waiting in the wings to buy several rarities when they become available. Dealers are selectively increasing their sight-unseen Bids for these dates in an effort to satisfy this demand. The majority of the dates that are unchanged this week are still entertaining supporting Bids. Volatility is also present among Proof Gold. Dealers have been telling us that Proof Gold issues are getting hot and one look at this week's NGC and PCGS Proof Gold columns will confirm their sentiments. Higher Plus signs are occurring for several denominations including $4 Stellas, $5 Indians, $10 Liberties, $10 Indians and $20 Saint-Gaudens. Higher sight-unseen Bids can be found in most grades with many reaching five-figures. Several dealers believe that Proof Gold is very undervalued today because of its relative rarity and beauty.

Morgan Dollars continue to prove that they are deserving of being among the strongest segments of the coin market. This week, plus signs can be found in this series as they have for so many months now. A pattern that has become all too familiar continues to be observed this week. Generic and select rare dates are increasing. Deep Mirror Prooflike issues are slightly higher in MS64 DMPL with strong supporting Bids being maintained for the MS63 and MS65 DMPLs. We know that strong demand for DMPL Morgans is evident as dealers try to find select dates for their customers. Rare dates are a story unto themselves. Check out the nice Bid increases this week for select Mint State Carson City issues dated 1879. Both varieties, the Capped Die and the regular "CC" Mintmark have increased in MS61 thru MS64. The 1879-CC is also higher in MS65. This date is one of the more popular "CC" Mint Morgans.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN Bulletin on a sight basis.

ATTN Mr. Dale Larsen

Dear Mr. Larsen

I thoroughly enjoyed our pleasant conversation of Thursday June 19 of this year. As a novice coin collector I have purchased some coins that I wish to sell.

I had decided to use Spectrum because of the fine reputation that the company has in the numismatic industry.

Speaking to you last week merely reinforced that opinion. You were very honest and forthright and I value the advice that you gave me. I hope this transaction is one of many to come in the future.

Sincerely yours

J.H.
New York

CERTIFIED COIN DEALER newsletter

Buyers Focus On Low-Pop Coins & Keys MS63 Morgans Move Up

"There's no slowdown at all." That is how one dealer put it when asked about the current state of the rare coin market. Many are in agreement as the "incredible demand" for select rare coins continues as we close out February. These dealers have ample reason to be this optimistic as they see "real collectors" willing to participate in the market and willing to pay the strong money that it takes to be a successful buyer. We agree with their views especially in the light of the million dollar transaction that occurred in February by Laura Sperber of Legend Numismatics with the purchase and resale of the second finest known 1885 Trade Dollar. Dealers tell us that the collector/investors who are extremely active today are simply people who always had some interest in coins. These are people who were happily filling the holes in their Lincoln Cent albums in their youth. However, now that they are older, more knowledgeable and affluent, they are the ones adding those key dates that so often eluded them years ago. Often, they are not just content to own one or two keys from different series but rather they are willing to accumulate the keys in multiples. That's because these people are not only interested in completing their coin sets but they have an eye on the investment aspect as well. They are much more comfortable buying coins today because they feel more secure about certification. It is important that they receive a third party opinion as to the grade and authentication of the rarities that they are accumulating. Many people are more at ease buying and selling rare coins from the privacy and security of their own homes, thanks to the internet. The ability to view hi-resolution color images of coins they are interested in allows them to get a clearer picture of the quality that they are considering.

It has been a wild ride of late for those who are buying and selling bullion sensitive coins. Obviously volatility within the precious metal's market has continued. However, volatility in metals shouldn't be confused with rare coin market volatility. That's because the rare coin market is demonstrating exceptional, steady strength in the face of sharply increasing and decreasing Spot prices. Still, dealers know that those individuals who have been buying common date circulated and Mint State Type Gold have been most affected. Those generic Gold coins have prospered and suffered in relation to Spot levels. The balance of the coin market is undeniably excellent. Dealers continue to point to there being a collector/investor emphasis on key dates, classic rarities and low population coins. They love coins with nice eye appeal as well. Collector/investors become extremely excited when offered a coin with a population of ten or less, as these coins are experiencing extraordinary demand.

The sight-unseen market continues to demonstrate strong demand and activity. Morgan Dollars, Lincoln and Indian Head Cents, Buffalo Nickels, Mercury Dimes and Walking Liberty Half Dollars command a huge amount of interest today. Morgan Dollars are realizing selective Bids for Carson City and other rarities that abound in this popular series. The two varieties of the 1879-CC, 1889-CC and 1893-CC have been experiencing increased Bids nearly week after week. These four dates represent the keys of the Carson City issues. Naturally dealers are trying to accumulate them. Generics are also once again increasing with MS63 and MS63 DMPL issues higher this week. Plus signs are also found among Silver Commemoratives, Buffalo Nickels and Walking Liberty Half Dollars. Buffalo semi-keys (1919-D and 1923-S) are targeted this week. So are a few tough Walkers in MS66. Silver Commems are benefiting from strong collector demand. It is apparent that the specific sight-seen market demand has greatly influenced the Bidding in the sight-unseen market. Increased Bids often point to a demand that continues to be unsatisfied.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or [illegible] that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy** During the thirty days prior to publication, we track the lowest sales-related prices in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols. "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Heavy Trading Expected In Baltimore Morgan Dollars Still Hot

Activity is still prevalent in the market with dealers very busy at making their final preparations before travel, once again, takes them away from home. Dealers tell us that since the last major show and public auctions they have been receiving many orders from customers. These orders will be with them when they travel to Maryland to attend the March 12-14 Baltimore Coin & Currency Convention. Many of the dealers that we speak with on a regular basis say that their inventories need to be "cleaned-up." Dealers try to keep their inventory fresh but the hectic activity level has prevented them from doing so. They will definitely be looking to buy coins at Baltimore for their customers. Still, they know that buying will be extremely tough and competitive and so they have to prepare themselves to do battle before they arrive. Bids and market levels have been extremely volatile and dealers need to recognize these new levels so that it doesn't cost them any money. Mistakes can be very costly.

The sight-unseen market is extremely active. We see many series and denominations receiving strong supporting Bids from several dealers. We know that many of these dealers are willing to pay even higher levels for these coins but they are still hoping to capture a few from sellers not in the know. For the most part, dealers have been pleased with the coins they have received, sight-unseen. Still, they know that they need to buy more because of the strong demand that is evident in today's market. Morgan Dollars appear to be the highlight of the sight-unseen market this week. Increased Bids are seen for many dates in the series but a lot of familiar areas continue to be targeted. Key and semi-key dates are still the big draw when it comes to Morgans. We see that plus signs are found chasing the 1883-S. This is a date that doesn't get the notoriety that the 1884-S receives but be assured, it is difficult to locate. Carson City issues have been on a roll for much of the last few years and we can see that this trend is continuing as we begin March 2004. It has been a case where dealers keep trying to satisfy an ever increasing demand for these popular issues. The GSA "CC" market has been on fire. Dealers keep battling one another trying to out-Bid each other in an attempt to buy some. The three key date Carson City GSA Morgans have been on quite an upswing. This is especially true for GSA Dollars that have been certified and graded by NGC. Increases are seen nearly every month, and this month, notice the jump in Bid for the graded GSA holdered 1879-CC, 1890-CC and 1891-CC Dollars. The balance of the sight-unseen market is mixed with Bid for several issues lower than our last report. This has resulted in a drop in the *CCDN Coin Market Index* for the **first** time in 71 weeks. The Mint State Gold Type section is, as expected, volatile considering the activity in the Spot market each day. Some discounting is also evident this week as dealers try to refresh their inventories.

Finally, two public auctions are scheduled in Baltimore. The Classics Sale featuring the Haig A. Koshkarian Collection will be held March 9-10. It is being conducted by American Numismatic Rarities. Next, the Dr. Robert W. Swan & Rod Sweet Collections offered by Bowers and Merena will take place March 11-13. We have listed a few of the many certified highlights from each of these sales.

DISCOVERY COIN

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."

And naturally, IT'S IN AN ICG HOLDER!

SPECTRUM NUMISMATIC AUCTIONS

Bowers & Merena, the premier coin auction company, has joined Teletrade® and Kingswood® to form Spectrum Numismatic Auctions, a dynamic new group of auction houses which provide a broad choice for discerning coin collectors who wish to realize the best possible prices, as well as enjoy the highest service, expertise and dependability.

Bowers and Merena Auctions has been in the forefront of the public auction arena for decades. Whether your collection is worth $5,000, $50,000 or more than $500,000, the same expertise that showcased the world's most valuable collections will showcase your coins to their fullest advantage.

Bowers and Merena has sold four out of the five largest coin collections ever sold at public auction, including the top two. Bowers and Merena was the first coin firm to sell a coin for over $1,000,000! Of the 17 highest prices realized by a rare coin at public auction, Bowers and Merena is responsible for nine of them. Bowers and Merena has handled every date and mint mark issue produced by the United States Mint and all its branches.

Auction veteran Stephen Deeds has been appointed President of Bowers and Merena Auctions and will lead the California and Louisiana offices. Mr. Deeds, whose numismatic career spans four decades, previously directed numismatic auctions for Superior Galleries in Beverly Hills, California.

Mark Borckardt joined the firm in June 1989 as Senior Numismatist. He is well known for his technical expertise and general knowledge of all aspects of United States coinage. Mark has been a contributor to the cataloguing of all important Bowers and Merena auctions since joining the firm.

And now our affiliation with Spectrum Numismatic Auctions provides us with the most important and largest list of collectors who will be made aware of the sale of your coins through our public auctions and on the internet.

Bowers and Merena was the official auctioneer for the 2003 American Numismatic Association Convention in Baltimore and their auction realized over $11,000,000. The Bowers and Merena auction, in conjunction with the Baltimore Coin & Currency Convention on December 5 & 6, realized over $4,000,000.

So call us today at **800.458.4646** and take advantage of this new force in the coin auction arena. It may well be the most financially rewarding decision you could make.

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XIX No. 11 March 12, 2004 Single copy price $4.00

$966,000 For Koshkarian/Norweb 1797 Half Dollar Higher Morgan & Peace Dollar Bids

The sight-unseen market is still active but it is mostly active for the select areas that dealers are really targeting. This is a situation that takes place repeatedly in the rare coin market with one area getting hot while another stays cool. It is easy to recognize a hot area by the sudden increase in the number of dealers Bidding and by the amount of higher Bids being offered for a particular area. It is also important to understand when there is an absence of Bids in a particular segment of the market. Dealers speak volumes with or without their Bids and we are constantly listening.

Sight-Unseen Bids are still blanketing the Early Gold Type columns as we mentioned last month. Buyers are available at *CCDN* Bid for nearly every issue in every grade. Dealers are Bidding for PCGS, NGC, ICG and ANACS certified coins. Remember, they are Bidding **sight-unseen**, it does not matter what the coins look like, just send the plastic, no questions asked! Draped Bust, Small Eagle $10 Gold issues are even moving higher. Increases are seen in nearly all grades from AU58 through MS64. Strength in the early Gold market is a solid indication that big spenders are out there waiting to put serious money into rare coins. It also shows that the prudent collector/investors remain bullish on the market. With interest rates at local banks remaining low, these collector/investors are not as concerned about plunking down larger sums of money for rare coins. They know that low interest rates mean that they are not giving up a lot when you consider the opportunity cost of money. They are also comfortable knowing that these numismatic rarities tend to hold their value extremely well and there is usually a buyer for this kind of material. We can also see that these, and other high priced numismatic rarities are regularly selling in public auctions throughout the nation. Peace Dollars are an area of the market that has been relatively quiet. This is especially true when they are compared to the Morgan Dollar series. However this week, activity and the number of plus signs has increased. We monitored some increases in this sector for a couple of weeks in February and now in March this interest is occurring again. Dealers know that it is a relatively easy set to complete in lower grades but in the higher grades it can become quite a task. Dealers are mostly looking to buy the middle range rarities for their customers. Morgan Dollars are seemingly invincible, continuing their torrid demand and activity. Pre 1921 generic Morgans in MS65 are now Bid at $90 for NGC or PCGS. The Carson City issues refuse to take a break and we see that the 1879-CC, 1879-CC Capped Die, 1889-CC and the 1893-CC are up in several grades. This makes the fourth straight week of increases for these issues. The popularity of the Carson City Morgan has been phenomenal over the past few years and we know that these dates are the keys for building a complete "CC" set. Prooflike examples and those given the Deep Mirror Prooflike attribution are higher as well. One astute dealer believes that key and semi-key Washington Quarters are too cheap and he is looking to shake things up with some sharply increased Bids. Walking Liberty Halves are receiving fewer supporting Bids resulting in some minus signs among the later issues. However, we know that early and middle date Walkers are not being given away so this may be the quiet before the storm. The balance of the sight-unseen market is fairly solid with only some sporadic discounting occurring. All-in-all the market is still bullish. Most dealers are already in Baltimore attending the large east coast show. The pace was hectic March 11th as dealers were busy trying to buy material before the public arrives for the final 3 days of the show. American Numismatic Rarities auctioned the Classics Sale featuring the Haig A. Koshkarian Collection on March 9-10. The spotlight was on the anonymous collector who spent just shy of a million dollars to own the 1797 Half Dollar with the Koshkarian/Norweb pedigree. This sale realized nearly $8 million. We have listed a few more certified highlights to the left.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

BOWERS AND MERENA

Joins

SPECTRUM NUMISMATIC AUCTIONS

Bowers & Merena, the premier coin auction company, has joined Teletrade® and Kingswood® to form Spectrum Numismatic Auctions, a dynamic new group of auction houses which provide a broad choice for discerning coin collectors who wish to realize the best possible prices, as well as enjoy the highest service, expertise and dependability.

Bowers and Merena Auctions has been in the forefront of the public auction arena for decades. Whether your collection is worth $5,000, $50,000 or more than $500,000, the same expertise that showcased the world's most valuable collections will showcase your coins to their fullest advantage.

Bowers and Merena has sold four out of the five largest coin collections ever sold at public auction, including the top two. Bowers and Merena was the first coin firm to sell a coin for over $1,000,000! Of the 17 highest prices realized by a rare coin at public auction, Bowers and Merena is responsible for nine of them. Bowers and Merena has handled every date and mint mark issue produced by the United States Mint and all its branches.

Auction veteran Stephen Deeds has been appointed President of Bowers and Merena Auctions and will lead the California and Louisiana offices. Mr. Deeds, whose numismatic career spans four decades, previously directed numismatic auctions for Superior Galleries in Beverly Hills, California.

Mark Borckardt joined the firm in June 1989 as Senior Numismatist. He is well known for his technical expertise and general knowledge of all aspects of United States coinage. Mark has been a contributor to the cataloguing of all important Bowers and Merena auctions since joining the firm.

And now our affiliation with Spectrum Numismatic Auctions provides us with the most important and largest list of collectors who will be made aware of the sale of your coins through our public auctions and on the internet.

Bowers and Merena was the official auctioneer for the 2003 American Numismatic Association Convention in Baltimore and their auction realized over $11,000,000. The Bowers and Merena auction, in conjunction with the Baltimore Coin & Currency Convention on December 5 & 6, realized over $4,000,000.

So call us today at 800.458.4646 and take advantage of this new force in the coin auction arena. It may well be the most financially rewarding decision you could make.

Need to contactAmerica's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than $425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2004 Numismatic Dealer Directory. I understand that my $325 fee entitles me to only one usage of these names. ______________________ signature

Portland ANA Show Next Stop Surprising Jump For Franklin Halves

The recently completed Baltimore Coin & Currency Convention possibly brought dealers a flavor of what's to come for the balance of the year. Activity at the show was brisk as was the public auction held in conjunction with the show. This activity found dealers trying very hard to buy coins even before the general public was entering the bourse. Dealers knew that the competition would be strong but they were still happy that some rare coins became available at prices they were willing to pay. Sales were taking place on the bourse and at the auction as dealers were buying and selling coins while trying to position themselves in a financially favorable light. They need to be competitive but they also have to watch their liquidity position. In some cases they are being forced to pay absolute top dollar for select coins while in other cases they are able to buy material for less money than they initially allocated. Most of the time, these coins have already been promised to one of their customers. Unfortunately, many customers that are looking for specific dates and denominations are still unfulfilled. One dealer at Baltimore told us that he was very happy because he was able to buy a very expensive six-figure Gold rarity that seldom appears on the market. However, now he has to decide which of his four customers who are all waiting to buy an example will get the first opportunity. These are the kind of circumstances that dealers are experiencing in today's market. This gives you a better idea and understanding of just how strong this market is and the kind of prosperity that many dealers are enjoying in 2004. Demand has been exceptionally strong and this favorable condition continues to grow.

Incidentally, we just learned that NGC has certified the Willis H. du Pont 1866 No Motto Liberty Seated Dollar with a Proof 65 designation. Only two coins are known to exist. This certification comes on the heels of its recent recovery after being stolen back in October 1967. This coin will join the Neil/Carter 1794 Flowing Hair Dollar and the Walton 1913 Liberty Nickel in a special display at the American Numismatic Association's National Money Show in Portland, Oregon, March 26-28. It should be a good ANA show too if the results at Baltimore carry any weight. The Bowers and Merena Dr. Robert W. Swan & Rod Sweet Collections auctioned at Baltimore March 11-13 realized nearly $6.3 million. We listed some of the certified highlights.

Last week, in the sight-unseen market, we highlighted the fact that Morgan Dollars continued to move to higher ground. Easily, this week could be a repeat of last as Bidders continue to prove that the strong demand for these popular cartwheels has yet to be satisfied. Plus signs are scattered throughout our Bid columns this week with better and key dates being the primary focus. Note the Buffalo Nickel, Standing Liberty Quarter, Morgan Dollar and $20 Saint-Gaudens series. Franklin Half Dollars appear to have been **undervalued** as a number of issues now have higher Bids. Bidders are targeting the MS64 grade for the most part and they are looking to buy NGC and PCGS examples. The sight-unseen market is also experiencing a few declines. We see that some discounting is taking place among some Silver Commems, Gold Commems and Proof Singles. Dealers do this routinely to make room for other coins, bolster their liquidity, pay recent auction bills or just because the coin has stayed around too long.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services (determined through careful study of market activity [illegible] nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Portland Provides Buying Opportunity
Sight-Unseen Bids Increase

The American Numismatic Association's National Money Show in Portland, Oregon is the place to be. For many dealers, this not only means a long flight but a rigorous number of hours spent each day viewing auction lots and walking the bourse in search of rare coins. Since March is winding up on a positive note, dealers have high expectations as they begin the show. Believe it or not one quarter of the year is nearly complete, and so far 2004 has been a very good year for dealers and collectors. Dealers have benefited from robust sales and an increasing customer base. Many dealers have also seen the value of their inventories increase as prices move higher. Collector/investors have benefited from being able to buy a few better dates that they have been waiting for. Apparently some of these dates have begun appearing on the market for one reason or another. A few stolen or lost coins have been recovered, and other rarities appearing on want lists are becoming available. No doubt, increasing prices and Bids have a way of shaking loose some of these coins as well. Holders of these rarities are more willing to sell because of the profit that awaits them. Many of these collector/investors, have made nice profits in a relatively short period of time. Other long time holders have benefited from buying coins when price levels were lower. Of course for new buyers, price levels are higher, but they are gladly willing to pay the price just to get the coin. Positive expectations for the Portland show should also get an additional boost from the favorable activity in the precious metal markets. Gold and Silver Spot have vaulted into positive territory since Baltimore and this activity has a way of increasing public attendance. Gold is again comfortably above the $400 per ounce plateau while Silver is trading for over $7.50 per ounce. Consequently, demand for common date Gold and Silver coins is increasing and so is the activity level of all the bullion related coins. Some dealers have experienced a "dramatic upturn" in Silver purchases just since last week. Dealers won't have much time to rest after the Portland show because many will simply head south for the Santa Clara (California) Coins, Stamps & Collectibles Exp., April 1-4. Superior will host their Elite Coin Auction in conjunction with the show April 2-3. We listed a few of the certified highlights from that sale below.

The final week of March finds the sight-unseen market entertaining strong supporting Bids throughout. Increases are also seen as dealers continue to push Bid a little bit higher each week hoping to capitalize on their efforts to secure some coins. Inventory levels continue to decline and dealers are beginning to become genuinely concerned. They need to be well stocked especially in a market that sports solid demand all around. Dealers are hoping to be the successful buyer on the bourse and at auction so that they can happily return home from the long trip. Increased Bids are noted in several areas of the market this week. Mercury Dimes are receiving some small increases for late dates of the series in MS65 and MS66. However strong supporting Bids are still chasing the early dates, especially the keys and semi-keys. For example, the 1923-S in MS64 FB is higher for both NGC and PCGS. Activity is also seen in our Proof Type columns. Liberty Seated Dimes and Quarters are sought-after in PR63 and PR64. These coins represent excellent values at current levels and dealers can usually buy them for approximately $1,000 or less. A few key date Morgan Dollars are up including 1879-CC, 1879-CC Capped Die, 1887/6-O and the 1896-O. Of course, MS65 generics continue to move a bit higher.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through [illegible] nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices) The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the [illegible] Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary [illegible] of the dealers and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.[illegible]

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest viable bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market based on monitoring Low Asks or Last Trades from *wholesale* trading networks, and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" Lowest asking price during the week prior to publication (week old); "**m**" Lowest asking price during the previous three weeks (*m*onth old); "**t**" *T*rade during the most recent month; "**lm**" Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

UNPRECEDENTED SIX-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the revised fourth edition of *The Coin Collector's Survival Manual™*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- **How to determine what a coin is worth and what grade the leading certification services would assign to it**
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer
- **How not to get ripped off if you buy coins through the mail or over the Internet — courageous information**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- **A comparison of PCGS versus NGC — which service does the market really favor?**
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

SPECIAL SECTIONS ON:

- **Doctored coins, how to detect them, and the case of the doctored hoard of gold rarities that got slabbed**
- The real truth about slab services "fixed grading standard" claims and premium quality coins
- Revelations from a leading coin trader
- **A grading service founder's startling admission of modified grading standards**
- The newest tax laws

CONTAINS ALL-NEW INFORMATION ON:

- **Gold coins as an economic safe haven**
- Coin conservation services
- **Coin insurance and safekeeping in light of September 11, 2001**
- The latest Internet strategies
- **Digital photography pointers**

and much, much more!

$8 Silver And $96 MS65 Morgans High Expectations In Santa Clara

The ANA's National Money Show in Portland was considered to be a success by most of the dealers that attended. A few east coast dealers failed to make the long trip west, but those who did were satisfied with their results. Activity was evident on the bourse with much business taking place, both wholesale and retail. Dealers that put in the effort were able to buy some of the dates needed for customers, and that alone made the trip very rewarding. Of course, the bull market continues to plow forward with demand growing and supply continuing to disappear. This is a concern of many dealers that depend on keeping their inventories fresh as well as having new rarities to offer to their best customers. Auctions are important as they help fill a part of this need, and we all know that there has already been quite a few that have taken place this year. Still, the demand has been more than equal to the supply as competition at these auctions has been remarkably strong. More and more collector/investors are participating in these sales online from the comfort and privacy of their own homes. This aspect of the auction market has made it more difficult for dealers to come away as successful buyers. Consequently, dealers need to be aggressive Bidders to ensure their success. Heritage conducted the Portland ANA 2004 Signature Auction featuring the Fred Miller Collection and the Dr. Robert Wharton Collection, Part II. This March 25-27 sale realized slightly more than $7.5 million. Now, most major dealers are already in California attending the Santa Clara Expo. This show continues to grow, and has expanded to four days of trading. Superior is on site hosting the April 2-3 Elite Coin Auction and dealers will battle it out once again for the select coins that they need. The expectations are growing during dealer set-up as most anticipate good things will happen. Silver climbing over the $8 per ounce plateau touching a 17-year high is definitely an added bonus. Gold Spot is also higher, hitting a 15-year high before profit taking pushed it back below $430.

The sight-unseen market continues to strengthen nearly every day. At auction we see far fewer PCGS and NGC coins selling for less than sight-unseen Bid. Morgan Dollars remain extremely strong. Generics continue to march onward and upward with MS65, MS66 and MS67 being Bid to higher levels. Generic Peace Dollars are also up, this time in MS64. Dealers have ready buyers for quantities of these Dollars, even at these higher levels. Rarities are also attracting attention in this series. The key, 1895, is higher in all Proof grades. Deep Mirror Prooflike rarities are also making some noise. At least one dealer is trying to buy 1902 and 1921 MS64DMPL Dollars and is willing to jump the sight-unseen Bid in an effort to secure them. Both dates are very tough, if even possible. The 1902 is now Bid at $6,000 for examples graded by either NGC or PCGS. Good luck! NGC has only graded one 1902 in MS64DMPL. PCGS has yet to grade a single DMPL example in any grade. The 1921 is also difficult to obtain in DMPL as well. GSA Dollars continue to attract increasing Bids from an ever widening group of dealers. The independent grading of GSA Dollars by NGC has certainly done its share in generating excitement for these issues. Dealers continue to increase their Bids for these because they are unable to keep up with the demand. Even relatively common ungraded GSA "CCs" are increasing. The 1883-CC and 1884-CC are now Bid at $160. Meanwhile the tough 1879-CC is now at $3,900 Bid. Type is also a hot area with Bidders chasing select issues for their customers. Plus signs are appearing for Uncirculated Liberty Seated Quarters and Dollars. No Cent Liberty Nickels are higher this week in grades MS64 & MS65 and remain popular because of their single year Type status. Some discounting is occurring among the late date Walkers but interest for the early and middle years is still evident.

Scott Travers' Top 88 Coins Over $100

44-COIN HOT LIST ◆ 44-COIN BLACKLIST

Foreword by Q. David Bowers

"*Scott Travers' Top 88 Coins Over $100* is potentially enriching, educational and enlightening. It provides market-oriented information against a rich backdrop of the history and lore of coins. *Top 88* is far more than just an investment book - it's a landmark work that opens the world of coinage to the reader!

◆ **R.W. Julian**, numismatic researcher and scholar

"Read this book closely and you'll get a new perspective on what really counts when you buy and sell coins. Follow the recommendations embodied in these pages and you'll be well on the way to being a winner yourself!"

◆ from the introduction by **Ed Reiter**, former numismatics columnist, *The New York Times*

Buying and selling rare coins can be a hit-or-miss proposition - unless you get expert directions. This book by well-known New York City coin dealer Scott A. Travers, with a foreword by Q. David Bowers, is a perfect guide.

In *The Top 88*, Travers draws a road map detailing both the hits and the misses - the coins that in his opinion represent good value at current market levels and those in his opinion you should steer clear of. He identifies 44 winners and 44 losers, puts them in historical perspective and vividly describes why each could be your best or worst coin buy. The list runs the gamut from classic U.S. coinage of the nation's early years to such modern-day issues as the Susan B. Anthony dollar.

You'll learn that winners and losers can exist side by side within the very same series. And you'll see how a given coin can sometimes be a winner in one grade, or level of preservation, and yet be a loser in a grade just a little bit higher or lower.

This book, like a piano, provides you with 88 keys that will help you make beautiful music - only this time, according to Travers, you'll be singing all the way to the bank if you play the right "notes" in buying coins.

You'll learn about:

- The elements of value
- **Independent third-party grading**
- The age of type coins
- **Opinions relating to what coins are "losers"**
- A list of coins that are "winners"
- **Why every coin listed has something to like and something to dislike**
- One-year type coins
- **Generic Morgan dollars**
- Commemorative coins
- **Mint-error coins**
- Uncirculated late-date coins
- **Late-date proof sets from 1968 to date**
- Marketplace data and expert opinions on every listed coin
- **Meticulously researched historical information**

ICG is Proud to Present

The "King of VAMs"

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

**The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."**

And naturally, IT'S IN AN ICG HOLDER!

Sight-Unseen Bids Increase As Demand Spreads Walking Liberty Half Dollars Advance

Throughout the year we have heard from many dealers simply praising the rare coin market. Often, we try to find out which particular area or series of the market is doing especially well. Most of time dealers tell us that the entire market is strong with demand evident in every area. Still, we know that some areas are doing a little better than others, but generally these dealers are correct. This week's higher sight-unseen Bids certainly go a long way towards validating their assessment of the market. Strong interest in rare coins has propelled Bids to higher levels week after week. These increasing Bids are not only seen in one or two segments of the market but in many areas. The demand for material has been growing and that need is forcing dealers to increase Bid in an effort to buy some coins. Increasing prices may persuade some holders of coins to put them back in the marketplace. Unfortunately, dealers know that many rare coins today have found their way into strong hands. These are individuals that are not in serious need of money and have bought coins to further diversify their portfolios. They have done this so that they aren't in a position to lose a large percentage of their assets. The severe drop in high technology stocks and the stock market in general a few years ago has done wonders for them to adopt this strategy.

Last week's Santa Clara Expo held in California was just another example of the strength found in today's market. Most dealers that were in attendance were pleased with their results. Still, many made an effort to buy coins and in some respects were disappointed. They are always looking to buy fresh deals and unfortunately there wasn't enough to satisfy the demand. Still, price levels on the bourse confirm the market's strength and the prospects for the balance of the year remain favorable. Bullishness in precious metals has contributed to the demand from an already expanding collector base. Gold and Silver spot prices have fluctuated in recent weeks, but overall the direction remains clear. Gold is holding above the $400 per ounce level and Silver is comfortably above $8. This scenario increases demand and contributes to a bright outlook for the overall market and its immediate future. So we see that this week is sporting plus signs in many areas. The diverse nature of the demand is evident throughout the Bid columns. We can even tell you that the series that don't have plus signs are receiving solid supporting Bids. Walking Liberty Half Dollars may claim the top honors this week. Bid increases are seen for NGC and PCGS issues covering the short-set years from 1941 thru 1947. Quality is important as demand is targeting most of the dates in MS64 and better. Many collectors build short-sets because of their affordability and availability making them relatively easy to complete. It also helps that they are attractive coins. Notice that some increasing Bids are also chasing the tougher early dates of the series, even some five-figure rarities. Select key and semi-key early dates are generating demand in grades from MS61 thru MS66. Finally, Proof Walkers are also in strong demand with NGC and PCGS examples grading MS64 and better increasing. Type is hot as well. Dealers want 3-Cent Silver issues in several Mint State grades and High Reliefs are headed higher among Mint State Gold. Proof 65 and MS65 examples of select Liberty Seated and Barber denominations are commanding higher prices. Dealers tell us that there is intense demand for this material at the moment, and much of the reason for this strength is based on the perception of it being undervalued. Sometimes this means comparing Bids from NGC to PCGS and vice versa. Increased sight-unseen Bids for NGC Buffalo Nickels are apparent for many key and semi-key dates. Dealers believe, at this level, they represent an excellent value and so they don't mind buying all they can, even **sight-unseen**. Morgan and Peace Dollars continue to attract the attention of dealers. Generic and better date examples are moving forward in both these series. Several major dealers are headed towards Las Vegas as PCGS and NGC will be holding their invitational trade-and-grade gatherings April 12-13 and April 15-16.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity [illegible] the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Coin Market Solid Despite Gold & Silver Drop
Sight-Unseen Trades Increase

Generally, the precious metal markets react to many influences causing them to move up or down. Many believe that favorable economic news concerning retail sales has had a negative impact on Gold and Silver. Retail sales figures for the month of March turned out to be much better than economists had expected and the Consumer Price Index increased 0.5 percent. Inflationary concerns sparked by fears of rising interest rates resulted in strength for the U.S. dollar (compared to the Euro and other foreign currencies) and a sharp drop in the metals. It was quite an impact too as Gold tumbled more than $20 an ounce and Silver an astonishing .96¢ from Monday's close. Several analysts also point to profit taking from major players creating an almost instantaneous snowball effect on prices. Today, Gold settled at $397.70 per ounce in New York and Silver at the $7.07 mark. As bullion investors hit the exits, bullion coin collector/investors did not. Dealers that we spoke with said that there wasn't any panic selling from their customers. They did concede that, for many, it was too soon for them to react. However, they did have some customers willing to buy and add to their positions. One dealer told us of a client who bought $50,000 in Circulated $20 Libs this week after spending $100,000 earlier on American Eagles. Others were interested in adding Mint State 61 thru MS63 $20 Saint-Gaudens and/or MS61-MS62 $20 Liberties. For the most part, those that are invested in Silver or Gold related coins are willing to hold. Most of them don't see any significant change in the fundamentals to warrant a reversal. Healthy bull markets do not always go straight up, some down-turns are to be expected. This volatility in bullion has had little effect on weakening the demand for rare coins.

Dealers continue to be extremely pleased with the market's performance and future outlook. One said that it's "exceptionally well." This is the same response that we are receiving from most of the dealers that we contact. They see customers regularly coming into their shops looking to buy anything that is attractive and problem free. They will buy nice Type, key dates, Dollars or just about **anything** that grabs their attention. As inventories get depleted, dealers are forced to attend more coin shows to find material. They also participate in public auctions and look to buy on the electronic dealer trading networks. **Sight-Unseen** trades continue to increase and dominate the reported transactions taking place. Strong Bids are entered anticipating success. Several areas of the sight-unseen market are realizing impressive Bids. Support is seen throughout the market and dealers are often looking to buy in quantity at these levels. Dollars remain HOT as the need for certified coins continues to increase. Just look at the sheer number of plus signs in the Morgan and Peace Dollar Bid columns. Generic Morgans are up again as television and other promotions continue to demand more product. The result is sharply increasing percentage moves in Bid for quantities of Dollars. Carson City Morgans and other scarce dates are also jumping. Notice the nice move up for Morgans dated 1894. This is a tough date to locate in any grade. Still, there are many other "S" and "O" Mint Morgans that are also desirable. Peace Dollars are active with plus signs blanketing the MS63 and MS64 columns this week. In all, dealers are looking for coins that offer value for their money. Silver Commemoratives are also receiving increased Bids. Collector demand is still strong. Type is steady with buyers always waiting for fresh material. Liberty Seated and Barber Type have been especially sought-after. Key dates are still hot. Notice the $3,000 jump for the key 1926-S Buffalo Nickel in MS65. One dealer is Bidding $70,000 **sight-unseen** with another dealer right on his heels at $65,000. Another key, the 1916 Standing Liberty Quarter is now entertaining a $20,200 Bid for MS65 Full Head specimens in NGC or PCGS. This represents a $200 increase on top of the $3,000 jump in February. High Reliefs are special to Mint State Type Gold collector/investors and they are up again in several grades.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Sight-Unseen Demand Remains Strong

Last week we explained some of the reasons why precious metal prices react in one way or another to market influences. These influences can be triggered from our own economic statistics or world events. Sometimes just the **hint** of future events can also cause havoc to these markets. That's exactly what took place this week as the Gold and Silver Spot plummeted. Analysts quickly pointed to Federal Reserve Chairman Alan Greenspan who told the Senate banking committee that deflation was no longer a threat, a sign that inflationary pressure may be increasing. This news did wonders for the U.S. Dollar on the world markets because the Fed could be signaling an increase in interest rates sooner than expected. Of course Gold and Silver reacted negatively as it has been moving in an inverse relationship to the Dollar. Still as iterated last week, dealers say there has been no panic selling of generic Gold Type or bullion related coins. Gold specialists say that demand has even increased a bit since the drop. The biggest problem that these dealers are facing is the lack of supply. "There aren't any coins to buy," said one dealer. They are still contacting all their usual customers trying to buy Gold but very few are willing to sell. These dealers have customers looking to add to their positions at current levels but unfortunately supplies remain tight. $20 Saint-Gaudens and Liberties are needed in all grades, from Circulated condition thru Mint State 67. The strongest demand is chasing Saints in MS63 and MS65 as well as MS65 Libs. However, even Double Eagles grading MS61 and MS62 are very salable. The only portion of the bullion market that may be a little soft, according to a specialist, is common MS63 Eagles.

See the chart for the 12-month change to the *CCDN Coin Market Index*. Some of the areas that are doing well have performed as expected but other areas of weakness may be a surprise. The index puts Walking Liberty Half Dollars, Morgan Dollars and Gold as the leaders for the past year. Walkers have shown strong collector/investor interest throughout the year for the short-set dates as well as the tough early dates. Those series and segments that have struggled for the past year include Matte Proof coinage, Franklin Halves, Standing Liberty Quarters, Mercury Dimes, Proof Singles and Gold Commems. Keep in mind that these series are figured in their entirety. Certainly we know that select rarities such as 1916-D Mercs and 1916 Standing Liberty Quarters have increased strongly.

Gold, and all its segments have demonstrated similar strength. Early Gold Type is on top followed by Proof Gold, Mint State Gold and Saints. The severe drop in bullion this week hasn't affected the strong demand for Gold. Mint State Gold Type is displaying remarkable support and demand in the face of declining bullion. Again, dealers are unfortunately faced with little supply and consequently, unable to satisfy all the demand for Gold. Jump Bids are seen for MS65 and MS66 $10 Libs and Indians. There are also other significant increases for MS65 among Type I Gold Dollars, $3 Gold and $5 Liberties. As the supply decreases and demand increases, dealers are left with few options but to raise their Bids. Morgan Dollars continue to move higher this week as they have done all year. Interest is strongest for Carson City, key and semi-key dates in the MS61 thru MS64 grade range. Several key New Orleans issues, 1895-O, 1896-O and 1897-O are realizing higher Bids. These keys are often found on want lists, not to mention that they also make a great addition to one's inventory. Peace Dollars are selectively higher. They have recently picked up and our index reports a respectable 5.6 percent gain over last year. Several increases are seen for Silver Commemoratives in low Mint State grades. Higher **sight-unseen** Bids are targeting the Boone, Arkansas, Texas and Oregon issues. These coins are just not available in lower grades as most were preserved as collectibles from the time of purchase and remain in MS63 or better condition. It has been months since we have seen these coins available or trade as you can see from the many blanks within our Market columns. Both Mint State Type and Proof Type are up as well this week. This is a further indication the strong demand for rare coins is spreading to many areas of the market. Therefore, dealers have been forced to widen their scope and look to buy in areas other than just their specialty.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer–to–dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales–related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CERTIFIED COIN DEALER newsletter

Dollars Continue To Climb
Shortage Pushes Sight-Unseen Bids Higher

Last week we mentioned how world events and other factors can greatly influence precious metal prices. This week, Gold fell to a six-month low after trading below $390 per ounce. Apparently, investors bailed with the news that China's State Council issued "guidelines" for select companies making new investments. They may need to use more of their **own** resources and money and consequently will reduce the amount of borrowing from banks. In essence, this will curtail the demand from China and it is being perceived as a negative for Gold. Silver Spot has also decreased precipitously. Yet through all the precious metal weakness, the coin market remains pretty much intact with the bull still **firmly** in control. See the chart below for a 16-month comparison of sight-unseen Bid for generic Morgan Dollars certified MS65 versus 14 ounces of Silver, which had nearly the same value January 3, 2003.

One lingering problem dealers continually complain about is the sheer lack of material. Hopefully, many of them will get a chance at buying some coins at the Central States Numismatic Society Anniversary Convention in Milwaukee May 6-9. Some dealers will first attend the special PNG preview May 5 and PNG day on May 6. They will also be participating in Heritage's Signature Sale held in conjunction with the show. The extreme need for material is evident from the growing number of increased sight-unseen Bids. The sight-unseen market as a whole is doing very well with select areas doing outstandingly well. A lot of interest forcing increased Bids is taking place for Mint State Type for the second consecutive week. Many increases are seen targeting Liberty Seated and Barber coinage in several denominations. Also notice the increases among Capped Bust and Draped Bust coinage. Proof Type is also active with plus signs appearing throughout. Morgan Dollars are even stronger. This series refuses to cool off despite increases nearly every week. Bidders are making a two pronged attack. First with generics, as sight-unseen Bids are higher for Dollars grading MS65 thru MS67. Second is with the rarities, where the real strength of the Dollar market is found. Buyers want select New Orleans, San Francisco and Carson City issues badly enough to keep pushing Bids higher. What a jump in generic Peace Dollars! Common date Peace Dollars grading MS63 and MS64 are up 13% and 15% respectively since last week. This really defines the strong need for material. Plus signs are dotting the NGC chart for early Walkers. These coins are scarce and in demand and dealers have to increase Bid to have a chance at buying some. Overall, increased sight-unseen Bids continue to be posted with trades occurring regularly. This is indicative of the strong and growing rare coin market
